

Ground Gas Venting

110mm/ 150mm Bespoke Venting Bollards

Typical Gas Venting Bollard Detail

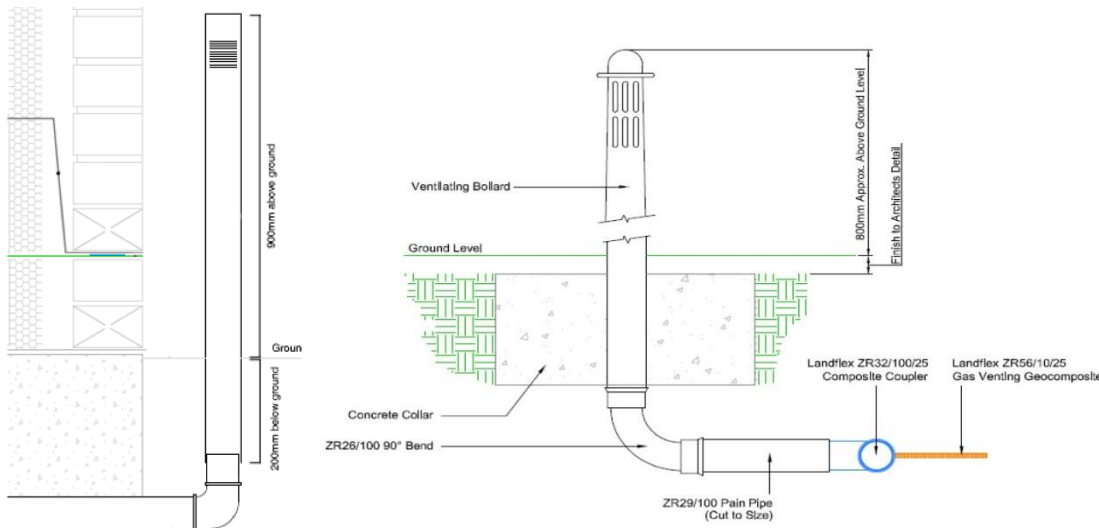

Butek Landline designs, manufactures and stocks its own ZR range of methane gas venting components suitable for all internal and external venting requirements. Items include venting geocomposite; vent boxes and lids; radon sumps; gas venting stacks and bollards; aspirating cowls and attachments; periscopic airbrick vents; slotted and standard pipework; geocomposite coupler tees; cross vent connectors; bends, tees and couplers; high strength invert adjustable bollards; stainless steel covers, frames and attachments. All items are designed to be compatible and to work together to form a complete gas venting solution. Components are available ex-stock and may be supplied singly or as a package to contractors wishing to install the system themselves.

Designed to provide effective air flow, allowing for adequate venting of sub-floor voids as part of Butek landline's Ground Gas Protection System.

Our bollards are manufactured in the UK and are designed to look exactly like standard bollards, enhancing the building surroundings and performing a multi-function as required.
